# Setup solar panel at home British Indian Ocean Territory

Trends in climate -- past, present and future -- always need to be understood in the context of the naturally occurring variability. Climate variability here, refers to the ways how climate conditions (e.g., temperature and precipitation) "flicker" from year to year within their respective typical "range of variability". The cause for this natural variability can be due to quasi ...

Nature"s Stepping Stones. The British Indian Ocean Territory (BIOT) comprises the 55 islands of the Chagos Archipelago. The land area is only 44km 2.But, below the territorial seas lie over 20,000km 2 of coral reefs - a near-pristine treasure store of marine life. The Archipelago lies at the centre of the Indian Ocean, its only human inhabitants now being military personnel on the ...

How Solar Panels Work. Solar panels work by converting sunlight into electricity through photovoltaic cells. These cells are made of semiconductor materials like silicon, which absorb photons from sunlight. When sunlight hits the cells, it knocks electrons loose from their atoms, creating an electric current.
