Solar investment Nauru

Who will implement solar project in Nauru?
The executing agency will be the Department of Finance and Sustainable Development. The implementing agency for solar component of project will be the Nauru Utilities Corporation (NUC). NUC will establish a project management unit within their existing organisational structure to implement the project.

How will ADB support the Nauru solar power development project?
ADB also provided GoN support to prepare a Feasibility Studyfor the recommended Nauru Solar Power Development Project which will comprise of a 6 megawatt PV plant coupled with a 5 megawatt /2.5 megawatt-hour battery energy storage system coupled with a SCADA installation.

Did ADB and Nauru sign a grant agreement for a solar power project?
Image: ADB and Nauru have signed a grant agreementfor a solar power development project. Photo: courtesy of PublicDomainPictures from Pixabay. The Asian Development Bank (ADB) and the Government of Nauru have signed a $22m (£17.8m) grant for a solar power project in Nauru,Australia.

How does Nauru get its energy?
Nauru predominantly sources its energy through diesel power generators. About 5% of its current energy demand is sourced from renewable energy,of which all is from solar power photovoltaic (PV) installations. A 500-kW ground-mounted solar installation was commissioned in 2016,and a number of residences have rooftop solar PV installations.

What is the impact of Nauru energy project?
The project impact is a reliable,affordable,secure,and sustainable energy supplyto meet the socio-economic development needs of Nauru. The outcome of the project will be that NUC,the state-owned power and water utility,will supply reliable and cleaner electricity.

How much will the government of Nauru contribute to the project?
The Government of Nauru will initially contribute $4.98m(£4m) for the project. The project is one of a series of renewable energy projects being financed by ADB's Pacific Renewable Energy Investment Facility,which was developed in response to the growing demand from the region for energy finance.

Solar power plant installed. The project will finance the installation of a 6MW ground mounted solar PV system, an 11 kV substation including feeders for the solar farm, for the BESS, for ...

Nauru receives very high levels of solar irradiation (GHI) of 5.9 kWh/m2/day and specific yield 4.7 kWh/kWp/day indica- ng a very strong technical feasibility for solar in the country.9 The Nauru Solar Power Development Project of capacity 2,500 ...
