Changing irrigation in Mozambique. In addition to these changing farming techniques, there is a push for farmers to get away from reliance on rain-fed irrigation. And solar irrigation is becoming an increasingly important and recognised element of this sustainable, future-proof farming.

De plus, l"énergie solaire est gratuite et en abondance pendant la saison sèche, lorsque les cultures nécessitent le plus d"eau. Les agriculteurs qui exploitent efficacement cette énergie gratuite en pompant de l"eau pour les champs et dans des réservoirs surélevés pendant la journée, alors que le soleil est le plus brillant, peuvent récolter d"énormes avantages.

Experience an ecological immersion in Miquelon with the tiny houses of Cabanes du Cap. Nestled between land and sea, these small homes incorporate sustainable principles such as composting toilets and solar panels, ensuring a minimal environmental footprint. Enjoy modern comforts while respecting the natural beauty of the island.

From manual irrigation to solar. Manual irrigation is labour intensive and, as a result, the size of land you can cultivate is limited. Switching to solar can give you hours back in your day as the pump will move water for you - either directly to the crops or to a tank for gravity irrigation later. From electric pumps to solar pumps
