Solar mems technologies Spain

Who is Solar MEMS technologies?
Solar MEMS Technologies is a company specializing in the development of sun sensors for space applications and other high-technology industries.

What does Solar MEMS specialize in?
Solar MEMS is a company specialized in the design and development of sun sensors for high technology applications in the aerospace and renewable energy industries. They offer services in R&D engineering to develop applications based on sun sensors or other technologies.

What is a Solar MEMS sun sensor?
C/Early Ovington 24,nave 1,Aerópolis,CP 41300,La Rinconada (Sevilla) Solar MEMS sun sensors for space industry have flight heritage since 2009. These products are based on SSOC technology (Sun Sensor on a Chip),developed by Solar MEMS. They are two-axis sun sensors for high accurate sun-tracking and attitude determination.

October 30th, 2024 (Seville, Spain) - SOLAR MEMS is pleased to announce that it has been selected by MDA Space Ltd. (TSX:MDA), a leading provider of advanced technology and services to the rapidly expanding global space industry, as part of the supply chain for MDA AURORA TM, a game-changing product line driving the transition from analog to digital satellite technology.

MEMS technology applied to the miniaturization of sun sensors can be used for automotive automatization and comfort: ... SOLAR MEMS Technologies S.L. Parque Aeroespacial de Andalucía Aerópolis. C/ Early Ovington 24, nv 01. 41300, Seville - Spain; Connect. Follow us; Watch us; smt@solar-mems +34 954 460 113; Policies. Quality Policy ...

SOLAR MEMS Technologies forma parte del proyecto CHIP NESE. El cual se basa en la creación de una placa integrada para globos estratosféricos autónomos, abriendo nuevas oportunidades en la investigación aeroespacial e industrial. ...
