Solardrive container power Trinidad and Tobago

What are the solar photovoltaic systems in Trinidad and Tobago?
In Trinidad and Tobago and the wider Caribbean there is an abundance of natural energy from the sun. In Trinidad and Tobago a typical day can be insolated for 5-6 hours of sunlight. This makes the Solar photovoltaic (PV) systems very applicable for Trinidad and Tobago. The cost for these systems are constantly coming down.

Can You Power a container with solar power?
You have a container. Let's power it with carbon-free,cost-efficient,plug-and-play,electricity. We are experts in solar energy. Our patent protected solar power units fits perfectly on top of 20' or 40' containers. No more hassle to get cost-efficient,green,energy to your containers. Containers are used for many purposes.

Is Trinidad ready for more solar power?
Every person involved in the process has certified solar installation training. Didn't know that was a thing in Trinidad,right? We're definitely ready for more solar powerto make a better,more eco-friendly and sustainable world for us all. We understand that solar power is a bit more expensive than other power systems.

Why should you choose the solardrive container power unit?
In remote areas where fuel is difficult or expensive to access,or in situations where you appreciate the silence of solar power,we can recommend considering the SolarDrive Container Power Unit as a supplement for the noisy and polluting generators. Preserving foods after harvest is crucial for the economy and environment.

How do solardrive CPS units work?
SolarDrive CPS units are physically interconnected or installed on top of containers by using simple twistlocks or horizontal locks (standard tools in the container industry). Electrical connection is obtained with a standard extension cord to a distribution board or directly to the container demanding power.
