San Marino -- a small but progressive republic -- has achieved an impressive milestone in its renewable energy journey. Over the past 15 years, the country has installed more than 4,200 private solar systems.. This remarkable achievement places San Marino among the global leaders in solar power production, with 450 watts of energy produced per capita.

The Solon switches, 100 in all, were mounted onto panels that are located on the exterior of the fusion test chamber. "Solon developed internal test equipment and procedures specific to this project to ensure that all of the devices performed well when they were received at Lawrence Livermore," added Dunn.
