If you"re interested in upgrading your solar array, or adding any solar maintenance features like a solar pest guard, snow breaks, or the SUNation Guardian Program, contact our SUNation Service Department today to get started at 631-750-9454, option 3, or visit our Service Store online.

I never said solar was bad. I said that I don"t think solar energy is there yet enough for me to get it. Solar panels last for 20 years, on average modules are typically warrantied for 20-25 years, after which they can still produce electricity, but the level of actual output is no longer guaranteed.

To do this, solar energy teams like SUNation"s look at a few factors: Sunlight Exposure: With the help of satellite imaging, solar site evaluators can create a map of your roof and see how much sun exposure your roof gets on average. This is useful in determining how the solar panels should be placed and can help spot any areas that are left ...

3. Solar Energy is Beneficial During All Seasons. While it"s true that solar panels perform optimally under direct sunlight, they also generate electricity even on cloudy or overcast days all year long. This adaptability means that solar energy remains a consistent and dependable source of clean power, no matter the weather conditions or the ...
