The solar park Sainshand in Mongolia was built in 2019, has a performance of 30 MW and will produce over 57 GWh electricity each year according to forecasts. GILDEMEISTER energy solutions (today Iqony Sustainable Energy Solutions) and LSG Group built the first solar park of this size in Mongolia on an area of around 330 hectares.

Mongolia"s recent period of growth has relied primarily on mineral wealth and energy production to fuel the economy and forward national development. The Mongolian government is aware of this over-reliance and the problems it creates for sustainable economic growth and the country"s environmental sustainability.

Demand for energy is growing steadily: demand for electricity grew by 5.8 per cent in 2022. However, the country is not investing enough in maintenance and network expansion. This presents the Mongolian energy system with major ...
