# Talk energy Bhutan

Why is Tata Power partnering with Bhutan?
Tata Power has also undertaken the transmission project for the 1,200 km Tala transmission line,which evacuates clean power from Bhutan to India. Lyonchhen Tshering Tobgay emphasised the significance of this partnership for Bhutan's energy future. "Bhutan currently generates only 2,444 MW,about 7.5 percent of its potential.

Why is energy important in Bhutan?
Energy in Bhutan has been a primary focus of development in the kingdom under its Five-Year Plans. In cooperation with India,Bhutan has undertaken several hydroelectric projects whose output is traded between the countries.

Who owns Bhutan Power Corporation & Druk Green?
Both the Bhutan Power Corporation and Druk Green are owned by Druk Holding and Investments,which exercises oversight in the investment and development activities of the energy companies. Both companies faced decreased profit margins largely because of losses due to increased energy price on repurchase from India.

How does Bhutan achieve a sustainable future?
Bhutan aims to achieve this goal by diversifying its energy portfoliobeyond traditional hydropower to include solar and geothermal energy while exploring innovative project structures and financing through strategic partnerships.

How much power does Bhutan have?
Bhutan's installed power generation capacity is approximately 1.6 gigawatts(GW). Over 99 percent of the country's installed capacity comes from hydropower plants,accounting for 1,614 megawatts (MW) of the country's total capacity of 1,623 MW in 2018. More than 99.97 percent of households have access to electricity.

Why is Bhutan partnering with India?
This partnership aims to enhance regional energy securitywhile supporting the transition to renewable energy in both Bhutan and India. The partnership is in line with Bhutan's vision to expand its total energy generation capacity to 25,000 MW by 2040.
