Is Tanzania's LNG strategy the crown jewel of Africa's Energy Future?
While Mozambique and West Africa race to extract and export,Tanzania is building something bigger: an LNG strategy that's sustainable,integrated,and future-focused. And in the process,it's quietly becoming the hidden crown jewel of Africa's energy future.

What percentage of Tanzanian households rely on electricity?
UNDP's Energy Access and Use Situation Survey II Report of 2020 notes that the proportion of households in Tanzania (Mainland) connected to electricity increased from 32.8% in 2016 to 37.1%in 2020. Most house holds (63.5%) still rely on firewood as the main source of energy for cooking -a health and environmental hazard.

Does Tanzania have a potential for LNG?
What Tanzania has isn't potential--it's inevitability. LNG here isn't just another natural resource project; it's a calculated move to redefine energy in East Africa and carve out a space on the global energy map.

Is Tanzania building a transformational energy strategy?
While the global stage is captivated by energy giants and flashy headlines from West Africa and Mozambique,Tanzania is quietly building something transformational--a strategy that is poised to change not only its economy but the energy dynamics of an entire region. Let's cut through the noise.

Are Tanzania's liquefied natural gas projects a star hiding in plain sight?
In the world of energy,Tanzania's Liquefied Natural Gas (LNG) projects are like a brilliant star hiding in plain sight.

How is electricity sold in Tanzania?
In Tanzania,electricity is sold at regulated tariffswhich are not very responsive to sudden changes in costs.
