Given the important linkages between closing the energy access gap and improving people"s health and wellbeing, it is critical to have integrated approaches to health and energy challenges. The global Health and Energy ...

In May 2019, the WHO, UN DESA, UNDP and the World Bank, in cooperation with the International Renewable Energy Agency (IRENA), launched the global Health and Energy Platform of Action (HEPA), a multi-stakeholder partnership aiming at strengthening the political and technical cooperation between the health and energy sectors.

Despite its minimal global emissions contribution, The Gambia"s focus on renewable energy expansion offers

dual benefits for energy security and development. The paper underscores the need for improved land management, crop diversification, and irrigation to boost adaptive capacity and resilience, ensuring food security amidst climate challenges.

In The Gambia, the lack of reliable, affordable power seriously hampers investment. But renewable energy technologies - whose cost has fallen rapidly in recent years - are more cost-effective than existing fossil-fuel power generation in the country. The country-led RRA consultations identified opportunities to diversify the country"s ...

The Health and Energy Platform of Action (HEPA) was launched at the 72nd World Health Assembly on Tuesday 21 May 2019. The Platform aims to strengthen the political and technical cooperation between the health and energy sectors at both global and country levels to accelerate the transition to clean energy, with an initial focus on clean cooking and ...

The Gambia is highly vulnerable to the impacts of climate change, including flooding, storm, droughts, and coastal erosion, which can trigger food insecurity and losses of tourism and fishing. The authorities have developed several strategies, including The National Climate Change Policy (NCCP), The Gambia 2050 Climate Vision, and The Gambia"s Long ...

The Sustainable Development Goals are a global call to action to end poverty, protect the earth"s environment and climate, and ensure that people everywhere can enjoy peace and prosperity. These are the goals the UN is working on in The Gambia.

The Health and Energy Platform of Action (HEPA) aims to build the political, and financial commitment as well as strengthen the capacity of the health and energy sectors to work together to ensure universal access to clean and sustainable ...

The project is also to accelerate the pace towards generating 50% of the nation"s power supply from renewable energy sources by 2030. Speaking at the inauguration, President Barrow said this came at a time when the whole world is promoting investment in renewable energy, particularly through solar energy projects.

At the United Nations (UN) 5th Conference for Least Developed Countries (LDC5), the Republic of The Gambia, the European Union (EU) and the European Investment Bank (EIB) announced the signature of a EUR24.08 million EU Global Gateway grant to be used alongside an EUR8 million EIB loan to support the implementation of a renewable energy on and ...

It also includes non-energy uses of energy products, such as fossil fuels used to make chemicals. Some of the energy found in primary sources is lost when converting them to useable final products, especially electricity. As a result, the breakdown of final consumption can look very different from that of the primary energy supply (TES).

Thus, The Gambia is becoming increasingly well positioned to help diversify its energy mix by incorporating new sources of renewable energy. H.E. the Vice President Dr. Isatou Touray presided (https://bit.ly/3Ely2qN) over the inauguration of a EUR2.7 million project named Renewable Energy Potentials in The Gambia on September 6, 2021.

framework that will help The Gambia to shift towards low-emission energy access and power generation while ensuring a low-emission sustainable development pathway. Marcel Alers Honorable Pa Ousman Jarju Head, Energy, Infrastructure, Transport & Technology Minister UNDP - Global Environment Facility Ministry of Environment, Climate
