Timor-Leste suncor energy company in

Is there a market for roof-top solar energy systems in Timor-Leste?
Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Is Timor-Leste a good country for solar energy?
Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia,where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

What does a solar technician do in Timor-Leste?
Technicians in Timor-Leste have experience in small-scale,off-grid solar energy systems. Commercial or industrial scale installations are more complex and appropriate technical capacity is scarce.

Does Timor-Leste have electricity?
Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the populationbut the country has yet to achieve energy security.1 Consumer costs,even with government subsidy,remain high and outages are common. In addition,most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

How long does a solar system last in Timor-Leste?
High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 yearsinstead of the global average of 6-10 years. Transitioning to solar can also help the country meet environmental commitments.

Do Timor-Leste businesses experience electricity outages?
Research shows that nearly all businessesin Timor-Leste experience electricity outages,in some cases multiple times a week. Outages affect businesses in different ways: For tourism businesses,it impacts customer experience (internet,device charging,air conditioning and fans,food quality,and inability to refuel diving tanks).
