Tuvalu fgc energy

What is the energy sector development project for Tuvalu?
The objective of the Energy Sector Development Project for Tuvalu is to enhance Tuvalus energy securityby reducing its dependence on imported fuel for power generation .

Where does Tuvalu electricity come from?
Tuvalu's power has come from electricity generation facilities that use imported dieselbrought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

What are the characteristics of Tuvalu's energy consumption?
Analysis of Tuvalu's energy consumption reveals the following characteristics: o Tuvalu's economy is almost totally dependant on oil. Only around 18% comes from local biomass resources,which is not accounted for in official statistics and is not the object of any active policy.

What is the Tuvalu solar power project?
The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project,which is a 40 kW grid-connected solar systemthat is intended to provide about 5% of Funafuti 's peak demand,and 3% of the Tuvalu Electricity Corporation's annual household consumption.

Does Tuvalu have biomass?
Traditional biomass - the burning of charcoal,crop waste,and other organic matter - is not included. This can be an important source in lower-income settings. Tuvalu: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Why is Tuvalu A good place to live?
Tomorrow's economy stems from today's environment. Investing in the quality of soil, avoiding water pollution, protecting natural resources especially energy sources as well as fighting against climate change will largely determine the success of Tuvalu's development for this new century.

The FGC UNIFIED ENERGY SYSTEM FUTURES forward curve below can help you understand how reasonable it is to buy the contract now and what it might cost in the future. It represents the current commodity"s price based on the future possible bid and ask by showing the relationship between the contract"s price and the time of its maturity.

FGC Energy Goals Relative to your baseline: Reduce electricity, natural gas, and/or fuel oil used per year by 5% or more; Increase renewable energy use by 5% or more; Energy Efficiency Lighting. Improve Building & Plant Performance with Energy Star; Retrofit fluorescent lighting with T5s or T8s instead of T12s;
