U S Virgin Islands battery transport box

What types of batteries can I mail or ship internationally?
There are many types of batteries that have different requirements when you wish to mail or ship them internationally: Wet batteries, also known as flooded lead-acid batteries, are commonly found in vehicles and backup power systems.

Where can batteries be shipped?
Batteries can be shipped on all main modes of transportation used in logistics: air,ocean,road,and rail. However,there are some different regulations and requirements depending on the mode of transport. Below we cover general guidelines applicable to all transport modes,but check the following dangerous goods regulations for specific info:

Can I ship lithium batteries by Ocean?
If you are shipping lithium batteries by ocean,you will need to make sure that you specify the correct UN numbers and Proper Shipping Names (PSNs),as established in the UN Recommendations on the Transport of Dangerous Goods,commonly known as the Orange Book.

Should you ship batteries safely?
From electric vehicles to laptops to massive grid storage systems, the demand for batteries is growing. And so is the need to ship batteries safely and efficiently. But hold up! You can't just toss lithium batteries in a box and call it a day. Transporting batteries is a serious business.

What documents do you need to ship lithium batteries?
These documents include: Dangerous Goods Declaration (DGD):This is a mandatory document for shipping dangerous goods,including lithium batteries. It declares the UN number,proper shipping name,the hazard class (Class 9),and the quantity of hazardous goods.

How do I ship a wet battery?
It must meet UN specifications for shipping hazardous materials and have an acid/alkali leak-proof liner. If you're shipping multiple wet batteries,enclose each in its own leak-proof container(e.g.,a sealed plastic bag or container) with absorbent material,such as vermiculite or acid-absorbing pads.
