Vatican City energÃ-a solar

How will a solar plant benefit the Vatican?
The Pope has given full authority to two special Commissioners to supervise the plant's construction,ensuring that the project is carried out efficiently and effectively. The energy generated by this solar plant will cover all the Vatican's energy needs,eliminating dependence on non-renewable energy sources.

Does the Vatican need a solar plant?
The implementation of a solar plant not only improves the Vatican's environmental sustainability, but also offers economic and social benefits. By generating its own energy, the Vatican can save on light. This is especially relevant in a context where the price of light is a constant worry for many.

Where is Vatican Radio's New solar power plant located?
The plant will be located in Santa Maria di Galeria,some 11 kilometers from Rome,where Vatican Radio's broadcasting station is located. Not only will this project generate renewable electricity,but it will also be integrated with the land's agricultural needs,combining modern technology with sustainable practices.

Can the Vatican save on light?
By generating its own energy,the Vatican can save on light. This is especially relevant in a context where the price of light is a constant worry for many. The use of solar energy also improves the State's energy efficiency,enabling a more responsible and sustainable light consumption.
