Does VPI Immingham CHP plant have a steam turbine?
VPI Immingham CHP Plant (VPI Immingham CHP Plant Phase II) is equipped with Toshiba steam turbine. The phase consists of 1 steam turbine with 200MW nameplate capacity. Franco Tosi Meccanica supplied electric generator for the VPI Immingham CHP Plant (VPI Immingham CHP Plant Phase I).

What is VPI Immingham's 'Humber Zero' initiative?
Subscribe Today! As part of the UK's Humber Zero initiative, VPI Immingham's gas-fired combined heat and power (CHP) plant will be home to the world's largest post-combustion carbon capture facility. The Humber region is

Where is VPI's Damhead Creek?
Located 30 miles south of London on Kent's Hoo Peninsula,VPI's Damhead Creek provides the capital and South East with vital and flexible energy generation. The Damhead power station leverages an efficient combined cycle system pairing two Mitsubishi 701F3 gas turbines with one Mitsubishi steam turbine.

With a capacity of 3.5GW, we are one of the leading power companies in the UK and Ireland. We create practical pathways to a new energy reality by optimising existing assets and delivering new energy projects and services.

With the acquisition of two existing battery storage facilities west of Dublin, VPI have taken the first step in supporting the on-going decarbonisation of Irish energy. The 200MW of battery energy storage at the Lumcloon and Shannonbridge sites, commissioned in 2021, will establish VPI as Ireland"s largest battery energy storage operator.

Immingham Combined Heat and Power Plant (also known as VPI Immingham) is a combined heat and power, gas-fired power plant adjacent to the Humber Oil Refinery near to South Killingholme North Lincolnshire, England.

VPI Immingham LLP has made a compulsory purchase order under powers in the Electricity Act 1989, to acquire land and rights adjacent to its combined heat and power plant at Rosper Road, Immingham, to be able to construct and operate its carbon capture plant, part of Humber Zero. Documents relating to the CPO can be found below.

VPI Immingham is a combined heat and power (CHP) plant near Immingham, on the South Bank of the river Humber. It is one of the largest CHP plants in Europe, capable of generating 1,240 MW - about 2.5% of UK peak electricity demand and up to 930 tonnes of steam per hour, which is used by nearby oil refineries to turn crude oil into products ...
