# Vrm energy Kiribati

What is the Kiribati energy roadmap?
The KIERis Kiribati's comprehensive energy roadmap,which takes into account renewable energy and energy efficiency potential in all sectors from 2017 to 2025.

Should solar PV be deployed in Kiribati?
The findings of this roadmap show that power sector is a key area,where the ongoing efforts from the deployment of solar PV should be continuedand complemented with and improvement of efficiency in Kiribati's entire energy system,including electricity use,heating,cooling,and transport.

Does Kiribati need electricity?
As a small,remote island state,Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures. Yet the current fossil fuel-based power system is inadequate to meet future demand.

The potential for this development of coconut oil as an alternative fuel for dissel, for both power generation and transport, is also a key element that reqires further development for a truly ...
