Wallis and Futuna tessera solar and stirling energy systems

(Tessera Solar August 2009 Press Release) Stirling Energy Systems (SES) is the global supplier of the SunCatcher(TM) solar dish engine system. The company is located in Scottsdale, Arizona, and has test dishes Sandia National Laboratories in New Mexico.

It was officially inaugurated in January 2010. It is the first utility-scale commercial solar plant operating in the US. The plant is owned and operated by Texas-based Tessera Solar and Arizona-based Stirling Energy Systems (SES). Ireland-based infrastructure and energy company NTR is the majority shareholder of Tessera Solar and SES.

This event should come as little surprise to followers of the Stirling/Tessera saga. In April 2008, Ireland"s NTR acquired a majority stake in Stirling Energy Systems for $100M. About a year ago, Tessera Solar, the dedicated development arm for SES, had two massive projects -- each with PPAs signed by major California utilities.

July 17, 2009--Stirling Energy Systems (SES) and its sister company Tessera Solar recently unveiled four newly designed solar power collection dishes at Sandia National Laboratories" National Solar Thermal Test Facility (NSTTF). Called SunCatchers, the new dishes have a refined design that will be used in commercial-scale deployments beginning in 2010. The four new ...

Those of us who have tracked solar energy innovations for several decades will likely have heard about Stirling engines. This sealed "heat engine" technology has been around a long time--since 1816, in fact--when it ...

Developer Tessera Solar has created a 1.5 megawatt power plant out of 60 SunCatcher solar thermal devices from Stirling Energy Systems. Later this year, Stirling will go ...

30 Solar Projects Eric Wesoff: September 29, 2011 Stirling Energy Systems, Dish-Engine Solar Maker, Files for Chapter 7 Bankruptcy. A Stirling Engine builder and developer fades away into obscurity.

Filed in September 28 (2009), the TESSERA SOLAR POWER FROM STIRLING ENERGY SYSTEMS covers Dish solar collectors for residential or commercial energy and power generation TESSERA SOLAR POWER FROM STIRLING ENERGY SYSTEMS Trademark - Serial Number 77836551 :: Justia Trademarks

"The opening of Maricopa Solar is a significant milestone for our companies and for the solar industry," said Bob Lukefahr, Tessera Solar North America CEO. "Maricopa Solar represents a genuine breakthrough in solar energy and demonstrates that Stirling dish solar power is now ready for commercial deployment in the US and

around the world.

Stirling Energy Systems (SES) and Tessera Solar recently unveiled four newly designed solar power collection dishes at Sandia National Laboratories" National Solar Thermal Test Facility (NSTTF)."The four new dishes are the next-generation model of the original SunCatcher system. Six first-generation SunCatchers built over the past several years at the ...

Tessera Solar North America Inc."s parent company, NTR Plc announced Feb. 17 that it reached an agreement to sell off the 709-megawatt (MW) Imperial Valley Solar Project in California to AES Solar. It"s the latest ...

Stirling Energy Systems (SES), maker of the SunCatcher concentrated solar power (CSP) technology, has filed for Chapter 7 bankruptcy. News reports said the company was unable to compete with the ...

Solar-Stirling-Dish von SES. Das Unternehmen SES wurde 1996 gegründet. Im selben Jahre erwarb SES die Patentrechte am sogenannten SunCatcher (englisch für Sonnenfänger), einem 1984 von McDonnell Douglas und Kockums entwickelten Solar-Stirling. In der Folge entwickelte SES den SunCatcher in Zusammenarbeit mit Boeing, die McDonnell Douglas übernommen ...

Stirling Energy Systems (SES) and Tessera Solar recently unveiled four newly designed solar power collection dishes at Sandia National Laboratories" National Solar Thermal Test Facility (NSTTF).Sandia"s concentrating solar-thermal power (CSP) team has been working closely with SES over the past five years to improve the system design and operation.

Tessera Solar North America announced the signing of a 20-year Power Purchase Agreement (PPA) with CPS Energy to develop a 27-megawatt (MW) solar project in West Texas, using the SunCatcher power system manufactured by Tessera Solar"s sister company, Stirling Energy Systems (SES). This is the first PPA to be signed by the company ...

Solar company Stirling Energy Systems has filed for bankruptcy, another casualty of a brutal global price war which is favoring commodity photovoltaic panels. ... Tessera Solar, which is a unit of ...

Concentrating Solar Power (CSP) is one of the most promising sources of renewable energy for the 21st century. Tessera Solar is the exclusive developer and operator of the SunCatcher(TM) solar dish Stirling system developed by Stirling Energy Systems, Inc. (SES). Tessera Solar International has been incorporated into SES activities.

Stirling Energy Systems (SES) and Tessera Solar recently unveiled four newly designed solar power collection dishes at Sandia National Laboratories" National Solar Thermal Test Facility (NSTTF). Sandia"s ...

Dish Stirling from SES. According to their website, Stirling Energy Systems (SES) was a systems integration

and project management company that is developing equipment for utility-scale renewable energy power plants and distributed electric generating systems ("gensets"). SES is teamed with Kockums Submarine Systems, NASA-Glenn Research Center, the U.S. ...

Tessera Solar, the sister company to Stirling Energy Systems, has won a bid to develop up to 500 megawatts of solar thermal power plants on land owned by Riverside County in California.

Tessera Solar North America Inc."s parent company, NTR Plc announced Feb. 17 that it reached an agreement to sell off the 709-megawatt (MW) Imperial Valley Solar Project in California to AES Solar. It"s the latest blow to Tessera Solar"s and Stirling Energy Systems" plans to build large-scale solar projects in California and elsewhere ...

New CSP generation systems such as the SunCatcher(TM) need experienced project development partners to bring them to market, and in Tessera Solar we are building a ...

Bob Lukefahr is responsible for all aspects of the North American development business which develops, owns and operates grid-scale solar facilities using Stirling Energy Systems (SES) groundbreaking SunCatcher(TM) Power System. Prior to joining Tessera Solar, Bob was President of BP Global Wind Energy / BP Power Americas.

Bob Lukefahr, Tessera Solar North America CEO, says: "Maricopa Solar represents a genuine breakthrough in solar energy and demonstrates that Dish Stirling solar power is now ready for commercial deployment in the US and around the world. With this milestone now behind us we look forward to breaking ground on our initial 1500 MW of projects in ...

Sandia National Laboratories in New Mexico, famous for its nuclear research programs is now home to Stirling Energy Systems, the solar thermal company that initially announced plans to develop large levels of solar thermal capacity in 2005 and subsequently dropped off the radar.The company is backed now with capital, an alliance with DOE and a ...

Stirling Energy Systems (SES) of Scottsdale, Arizona, a system manufacturer of dish-engine solar plants, has filed for Chapter 7 bankruptcy according to an article in Renewable Energy World.Our ...

Developer Tessera Solar has created a 1.5 megawatt power plant out of 60 SunCatcher solar thermal devices from Stirling Energy Systems. Later this year, Stirling will go into volume production ...

S& C Electric Company has been awarded a contract to perform engineering services for one of the largest solar plants in the world, Calico Solar. The plant, located near Barstow, California, is being developed by Tessera Solar and EPC firm Mortenson Construction and will utilize the Stirling Energy Systems" (SES) SunCatcher solar dish Stirling systems to put 850 megawatts ...

Wallis and Futuna tessera solar and stirling energy systems

(ADPnews) Jan 25, 2010 - Stirling Energy Systems Inc and solar power facilities developer Tessera Solar officially inaugurated a 1.5 MW pilot concentrated solar power (CSP) facility in ...

(Tessera Solar August 2009 Press Release) Stirling Energy Systems (SES) is the global supplier of the SunCatcher(TM) solar dish engine system. The company is located in Scottsdale, Arizona, and has test dishes Sandia National ...

CC0000: Color Is Not Claimed As A Feature Of The Mark. D10000 "Solar Power" And "Energy Systems" DM0000: The Mark Consists Of An Array Of Quadrilateral Shapes Appearing Side By Side In Different Rows Located To The Left Side Of The Words "Tessera Solar Power From Stirling Energy Systems".

The 1.5-MW Maricopa Solar power plant is the first to use Stirling Energy Systems" Stirling dish technology, which will be deployed at 1,500-MW plants in California and Texas. Courtesy:...

Only four months after breaking ground, Tessera Solar and Stirling Energy Systems (SES) recently showcased the highly anticipated Maricopa Solar power plant, which ...
