Will Morocco double green electricity production in Western Sahara?

(Bloomberg) -- Morocco,buoyed by recent foreign recognition of its rule over Western Sahara,plans to double green electricity productionin the disputed territory to meet growing demand before it co-hosts the 2030 FIFA World Cup.

What is Western Sahara's green power capacity?

Western Sahara's current green power capacity is about 1.3 gigawatts,or about a quarter of the nation's total renewables capacity. A project to develop a 3-gigawatt cable linking renewable plants in the territory to central Morocco has attracted interest from private investors,said the official.

The government has set a target of generating 75% of its electricity from renewable sources by 2050, and solar energy is expected to play a major role in achieving this goal.
