2 · This reduces the Zappi output taking the house consumers into account so that the 6.6kW is not exceeded. The value of the Zappi fuse should be entered for the device limit. Ideally 32A, in this special case at least 16A (11kW) because this allows the Zappi to use the 6.6 kW from the grid plus your own generation.

MyEnergi"s Zappi charging point is a smart EV charger for homes and businesses. It"s available in four versions, each of which comes in white or black. Tethered Zappis have a type-two charging ...

Zappi myenergi Kazakhstan

New Zappi, single phase, untethered, Ampera. Won"t release the cable once charged or if the car is disconnected (type 1 so not locked in) Seems the only way to get the cable out is to turn off the Zappi. I"m guessing this a setting unless the Zappi has a bug. Charging complete get a flag but no + as the manual suggests. Lock settings EV Plugged ...

myenergi will install a zappi 22kW untethered Zappi at your premises or at a location of your choosing. The zappi must be within 20m of the nearest distribution board; Wi-Fi connection is your responsibility; All transactions are subject to our sales terms and conditions at Terms and Conditions for the Sales of Goods and Services - myenergi ...

Myenergi do allow customers to purchase the optional 8M lead that the V1 came with, if you do wish to do that please speak with our sales team. If you have a V2 Zappi the only way you can get a longer cable and keep the warranty is to have a untethered unit and then you can have as long as you want for a cable.

ZAPPI-2H07UB-G - Zappi Eco-Smart EV Charge Point 7kW Untethered Black . The Zappi Eco-Smart EV Charge Point 7kW (Untethered, Black) is a reliable and energy-efficient electric ...

You should try to get the Zappi v2.1 with Lan/wlan. then the HUB is integrated in the Zappi and you only have to bring the lan with a powerline adapter to the zappi. The only challenge that remains is the Harvi for the ct. This is necessary for the timers! the Harvi is still connected to the zappi at 868mHz. See also here: Communications-Principles

I have 3 phase system with following set up: Zappi, each CT on each phase all set to grid Harvi, each CT on each phase of PV/battery input as per the ... myenergi > General > General Discussion > 3 phase zappi eco+ issue. Forum rules. Share. Share with: Link: Copy link. 6 posts 3 phase zappi eco+ issue. 3 phase zappi eco+ issue.

The Zappi Mode is only defined as a Select entity (select.myenergi_ev_charge_mode). It can be changed on a Dashboard but it does not change the status in the App or on the Zappi.; afterward a short period it is reset to the current status. The integration provides Services for boosts but the mode change. I am simply seeking some ...

2 · This reduces the Zappi output taking the house consumers into account so that the 6.6kW is not exceeded. The value of the Zappi fuse should be entered for the device limit. ...

5 · The Zappi uses the PWM to indicate to the car how much charge is available and the car decides how much of that charge to use. For a single phase Zappi maximum charge is around 32 amps / 7.2 kW and a PWM of 53% indicates that is available. If the PWM is less than that, then the Zappi is limiting charge.

A couple of days ago I updated my Zappi v1 but I encounter several problems. This is the first picture I"d like to start with. Maybe this is not related to the update, but this is the 3th time since the update this is on the display and of course, Zappi and Harvi are red on the Hub.

I find the Zappi handbook badly written. There are many examples of its versatility but there are many more options on the control panel than are desc. ... Myenergi support will sort it for you I am sure. prawlin. 4,488 2,241. Grand Master. prawlin. 4,488 2,241. Post Aug 04, 2021 #8 2021-08-04T18:39+00:00.

Come on guys, its a great unit but you can do better than this. I think the unit is great but the manual supplied for the Update process must be for the Zappi 1 as it bore no relation to the switches on the Zappi 2. I did download the latest firmware to the Hub as instructed and found the bootloader menu in the Advanced options on the Zappi.

The myenergi zappi seamlessly connects your electricity supply to your electric car. Once installed, simply plug in your EV and enjoy hassle-free electric car charging from the comfort of ...

Set device priority so that Zappi is #1 and Eddi is #2. Your myenergi system should then behave as you wish. Note that the Eddi may consume the available surplus before there is enough for the Zappi. The Zappi needs a minimum of 1.4kW for single phase and 4.2kW for three phase.
