What is the Sun ZFS storage appliance?

The Sun ZFS Storage Appliance is Oracle's preferred NAS storage system with unified storage capability for enterprise tier 1 environments(). It offers a rich set of enterprise-class data services,industry-leading performance,and Oracle Hybrid Columnar Compression--for Oracle Databases.

What is Oracle ZFS storage appliance?

Oracle ZFS Storage Appliance is a high performance,enterprise storage systemthat is optimized for Oracle workloads and cloud integration. It is a unified storage system that allows customers to consolidate file,block,and object storage on a single platform.

Is the Sun ZFS storage 7420 compatible with 240VAC sources?

Note: The Sun ZFS Storage 7420 is compatible with 200-240VACsources only. All other items listed above are compatible with 100- 120VAC or 200-240VAC sources. For more information about Sun ZFS Storage Appliance,please visit oracle.com or call +1.800.ORACLE1 to speak to an Oracle representative.

What is ZFS high availability & Oracle intelligent storage protocol (OISP)?

ZFS Storage-High Availability packages the ZFS file server in a highly available, automated deployment stack that uses OCI Block Volumes. Oracle Intelligent Storage Protocol (OISP) enables ZFS Storage Appliance to automate storage setup and tuning based on database-specific information, reducing storage administrator workloads by up to 70%.

What is a Sun ZFS storage 7320?

It delivers 3.3 TB to 177 TB of raw capacity and provides customers with easy-to-use enterprise data management functionality at an entry-level cost. The Sun ZFS Storage 7320 redefines midrange storage for enterprises,with simplified management,performance,efficiency,and seamless expansion to meet growth needs.

What types of object storage services are available?

Swift,S3,and OCIobject storage services make it easy for IT teams to migrate data between an on-premises and cloud object storage. ISCSI,Fibre Channel,and RDMA over InfiniBand support allow customer applications to access high-performance block storage.

A system update for Oracle ZFS Storage Appliance is a binary file that contains new management software as well as new hardware firmware for your storage controllers and disk shelves. Its purpose is to provide additional features, bug fixes, and security updates, allowing your storage environment to run at peak efficiency. ...

NAS Storage - Oracle ZFS Storage Appliance Oracle ZFS Storage Appliance, the first application-engineered disk storage system, enables customers to reduce capacity, complexity, and cost with high performance, efficiency, and unmatched Oracle software integration.

DE3-24C Disk Shelf. The Oracle Storage Drive Enclosure DE3-24C is a 4U chassis that supports 24 3.5" SAS-3 drives. The high-performance HDDs provide reliable storage.

Oracle ZFS Storage Appliance includes technologies to deliver the best storage price/performance and unprecedented observability of your workloads in production, including: ...

The command line is an efficient and powerful tool for repetitive administrative tasks. The appliance presents a CLI available through either the Console in Oracle ZFS Storage Appliance Installation Guide, or SSH. There are several situations in which the preferred interaction with the system is the CLI, as follows:

The system has two different kinds of ACLs and both are stored inside your datasets: ACLs on all files and directories (let"s call them file ACLs): These are used for general Unix access and also are active when sharing the filesystem.They are stored with each file or directory (use /usr/bin/ls -V /pool/filesystem/yourFile or /usr/bin/ls -Vd /pool/filesystem/yourDir ...

address. Each sender needs the information to the next gateway. For an Oracle ZFS Storage Appliance system, it is sufficient to have information on the IP address of the nearest gateway for each of its configured subnets. Routing information for Oracle ZFS Storage Appliance is kept in a single routing table consisting of a collection of routing ...

workloads) and the Oracle ZFS Storage Appliance ZS7-2 high end (for high-end enterprise storage workloads). For specific details of the current Oracle ZFS Storage Appliance systems" hardware and configuration options, see the Oracle storage product documentation. All Oracle ZFS Storage Appliance systems run the same enterprise storage OS.

Oracle ZFS Storage Appliance architecture is designed for flexibility, offering a number of network connection options. File-based services can be configured using Ethernet and InfiniBand network adapter options. Block-based (LUN) services can use either network (iSCSI) or Fibre Channel adapter options.
