# Zimbabwe amen solar

How many MW of solar energy has Zimbabwe deployed in 2022?
According to the International Renewable Energy Agency,Zimbabwe had deployed 41 MWof solar by the end of 2022. This content is protected by copyright and may not be reused. If you want to cooperate with us and would like to reuse some of our content,please contact: editors@pv-magazine.com.

Will Zimbabwe have a green hydrogen power plant?
Plans for Zimbabwe's first utility-scale green hydrogen power plant, with 178 GWh of expected annual electricity production, were finalized in March 2023. According to the International Renewable Energy Agency, Zimbabwe had deployed 41 MW of solar by the end of 2022. This content is protected by copyright and may not be reused.

Why is Zimbabwe focusing on renewables?
Zimbabwe's focus on renewables comes as it attempts to lessen its reliance on energy imports and improve access to electricity,as World Bank data shows that just 49% of the country had access in 2021. The country still faces significant power deficits,which contribute to regular power outages.

Why is Zimbabwe struggling with electricity supply and access?
A Zimbabwe Economic Update published by the World Bank in December said that the weak financial performance of energy companies, insufficient central planning, and limited private sector participation have been exacerbating problems with electricity supply and access.

How much money will Zimbabwe get from the SDG fund?
Local media outlets have reported that the investment includes $10 millionfrom the United Nations Sustainable Development Goals (SDG) Fund,alongside an additional $35 million from the government of Zimbabwe and local partners such as the Infrastructure Development Bank of Zimbabwe and Old Mutual Investment Group.
